ABOUT

As a seasoned smart contract engineer with over four years of experience, I bring an in-depth understanding of DeFi, NFTs, DAOs, dApps, EVM, cross-chain bridges, layer 2's like optimistic and zero knowledge (ZK) rollups and the wider web3 ecosystem. With a specialty in Solidity smart contract development, I've contributed to numerous web3 projects since 2018.

Combining my technical proficiency with a native-level English fluency, I am a skilled communicator, adept at remote collaboration, and always focused on delivering results in this rapidly evolving sector.

EDUCATION

Bachelor of Economics, Major in Business Informatics

- University of Novi Sad, Faculty of Economics
- October 2019 - October 2023

EXPERIENCE

ScaleRoad LLC / Full Stack Web Developer (July 2018 - March 2019)

- A SaaS platform for tracking and managing investment research
- I worked on building custom UI elements and complex backend logic

Axix Finance / Smart Contract Engineer (March 2019 - December 2020)

- Tokenized volatility protocol designed to track the price of VIX on-chain
- I built the smart contracts for the protocol and integrated on-chain price oracles

LongTerm Finance / Smart Contract Engineer (December 2020 - June 2022)

- Tokenized index fund protocol tracking the market cap of the entire altcoin market
- I built the entire protocol from scratch, and helped create their frontend dashboard

MAJR, Inc. / Senior Smart Contract Engineer (June 2022 - May 2023)

- Web3 media company focused on the creator memberships & digital assets
- I designed and developed smart contracts for the MAJR DAO from the ground up

Smart Contract Security Audits

- My code has been audited by the professional smart contract security auditors
- I received close to perfect score each time. See [audit 1](#) and [audit 2](#) for more details

TokenFlow / VP of Blockchain Engineering (May 2023 - Present)

- Smart contract development agency specialized in building custom solutions
- Responsible for prompt project deliveries and leading the in-house engineering team
