I'm a full stack developer from Novi Sad, Serbia with a **huge passion for crypto, DeFi & web3**. I've always been a visual person that **enjoys building products and delivering solutions** that make users' lives easier. I truly thrive when **working in a team of passionate, like-minded people** that are driven to make the most out of every project.

I'm a highly competitive, low-maintenance, communicative and self-motivated person that everyone in the team can count on in any situation. I understand **DeFi, NFTs, DAOs, dApps, web3, crypto and blockchain in general** at a very high level and I've been fascinated by the whole space since I got interested into it and **started building my first web3 projects back in 2018**. Also, I **speak English with a native-level fluency and I'm used to working remote**. Naturally, I highly prefer getting paid in crypto.
