ABOUT ME

As a seasoned Senior Solidity Smart Contract Engineer with over five years of experience, I bring a comprehensive skill set in various sectors of the web3 space, including DeFi, NFTs, DAOs, dApps, blockchain oracles, EVM, cross-chain bridges, layer 2 scaling solutions, liquid staking and restaking (LSTs and LRTs), RWA (real world assets) tokenization and more. I have contributed to numerous web3 projects since 2018, delivering hundreds of production-ready smart contracts that have been battle-tested through rigorous audits and deployed on various chains, serving thousands of users.

My expertise is complemented by native-level English fluency, strong communication skills, and a proven track record in remote collaboration. I am dedicated to delivering impactful results in the rapidly evolving web3 ecosystem.

EXPERIENCE

Intuition Systems, Inc. / Senior Smart Contract Engineer (January 2024 - Now)

- Led the development and open-sourcing of v1 and v2 Intuition protocol contracts.
- Ensured production-readiness for 30+ innovative smart contracts that went through rigorous audits and open-source audit competitions.

TokenFlow / Senior Smart Contract Engineer (May 2023 - December 2023)

- Led the design and development of complex smart contract systems for 15+ different web3 protocols, achieving high standards in performance and security.

MAJR, Inc. / Senior Smart Contract Engineer (June 2022 - May 2023)

- Developed MAJR DAO and NFT contracts from scratch, comprised of 20+ production-ready smart contracts that achieved exceptional scores across three separate audits.

LongTerm Finance / Smart Contract Engineer (December 2020 - June 2022)

- Developed core protocol contracts to tokenize the entire altcoin market cap onchain, supporting 10+ collateral types across multiple different chains.

Avix Finance / Smart Contract Engineer (March 2019 - December 2020)

- Built custom onchain oracles to track the stock market volatility, enabling the VIX tokenization within the protocol with close to 100% precision.

ScaleRoad LLC / Full Stack Software Engineer (July 2018 - March 2019)

- Enhanced UX and platform performance with custom UI elements and reliable, low-latency APIs achieving ~100% uptime.

SKILLS

Solidity

Foundry

Hardhat

Ethers.js

TypeScript

Node.js
