I'm a senior smart contract engineer with a **huge passion for crypto, DeFi & web3**. My specialty is in the **solidity smart contract development** for a wide array of use cases. I truly thrive when **working in a team of passionate, like-minded people** that are driven to make the most out of every project.

My understanding of **DeFi, NFTs, DAOs, dApps, web3, crypto and blockchain in general** is on a very high level. I **started building my first web3 projects back in 2018**. I knew it right from the start that web3 is **my way of making a dent in the universe**. Also, I speak English with a native-level fluency and I'm **completely used to working remotely**.
