MIHAILO MAKSA

SENIOR SMART CONTRACT ENGINEER

📍 Novi Sad, Serbia | 📅 **Calendly** | ✉ **mihajlomaksa9@gmail.com**

in **LinkedIn** | 🐦 **Twitter** | ○ **Github** | 🌐 **mihailomaksa.com**

ABOUT ME

As a seasoned **smart contract engineer with over 4 years of experience,** I bring an in-depth understanding of **DeFi, NFTs, DAOs, dApps, blockchain oracles, EVM, cross-chain bridges, layer 2 scaling solutions like optimistic and zero knowledge (ZK) rollups and the wider web3 ecosystem.** With a specialty in **Solidity** smart contract development, I've contributed to numerous web3 projects since 2018.

Combining my technical proficiency with a native-level English fluency, **I am a skilled communicator, adept at remote collaboration,** and always focused on delivering results in this rapidly evolving sector.

EDUCATION

Bachelor of Economics

- University of Novi Sad, Faculty of Economics
- October 2019 - October 2023

EXPERIENCE

ScaleRoad LLC / Full Stack Web Developer (July 2018 - March 2019)

- A SaaS platform for tracking and managing investment research
- I worked on building custom UI elements and complex backend logic

Avix Finance / Smart Contract Engineer (March 2019 - December 2020)

- Tokenized volatility protocol designed to track the price of VIX on-chain
- I built the smart contracts for the protocol and integrated on-chain price oracles

LongTerm Finance / Smart Contract Engineer (December 2020 - June 2022)

- Tokenized index fund protocol tracking the market cap of the entire altcoin market
- I built the entire protocol from scratch, and helped create their frontend dashboard

MAJR, Inc. / Senior Smart Contract Engineer (June 2022 - May 2023)

- Web3 media company focused on the creator memberships & digital assets
- I designed and developed smart contracts for the MAJR DAO from the ground up

Smart Contract Security Audits

- My code has been audited by the professional smart contract security auditors
- I received close to perfect score each time. See **audit 1** and **audit 2** for more details

TokenFlow / VP of Blockchain Engineering (May 2023 - Present)

- Smart contract development agency specialized in building custom solutions
- Responsible for prompt project deliveries and leading the in-house engineering team

SKILLS

| Solidity | Hardhat | Foundry | Ethers.js | TypeScript | Node.js |
