ABOUT ME

As a seasoned **full stack web3 and smart contract engineer** with over 4 years of experience, I possess a comprehensive understanding of DeFi, NFTs, DAOs, dApps, blockchain oracles, EVM, cross-chain bridges, layer 2 scaling solutions and the wider web3 ecosystem.

Specializing in both frontend and backend development within the web3 domain, I've been instrumental in the success of numerous web3 and DeFi projects. My expertise covers smart contract development, as well as seamless integration of blockchain elements with user-friendly interfaces and traditional backend APIs, ensuring optimal functionality, best practices, and top-tier security across the full stack.

Combining my technical proficiency with a native-level English fluency, I am a skilled communicator, adept at remote collaboration, and always focused on delivering results in this rapidly evolving sector.

EXPERIENCE

ScaleRoad LLC / Full Stack Engineer (July 2018 - March 2019)

- A SaaS platform for tracking and managing investment research
- I worked on building custom UI elements and complex backend logic

Avix Finance / Full Stack Web3 Engineer (March 2019 - December 2020)

- Tokenized volatility protocol designed to track the price of VIX on-chain
- I built the smart contracts for the protocol and integrated on-chain price oracles

LongTerm Finance / Full Stack Web3 Engineer (December 2020 - June 2022)

- Tokenized index fund protocol tracking the market cap of the entire altcoin market
- I built the entire protocol from scratch, and helped create their frontend dashboard

MAJR, Inc. / Senior Smart Contract Engineer (June 2022 - May 2023)

- Web3 media company focused on the creator memberships & digital assets
- I designed and developed smart contracts for the MAJR DAO from the ground up

Smart Contract Security Audits

- My code has been audited by the professional smart contract security auditors
- I received close to perfect score each time. See audit 1 and audit 2 for more details

TokenFlow / Senior Smart Contract Engineer (May 2023 - Present)

- Smart contract development agency specialized in building custom solutions
- Leading the design and development of complex smart contract systems

SKILLS

Solidity   Hardhat   Foundry   TypeScript   Node.js   React
